

KHALED ALRUWITA

Data Analysis & Data Engineer

✉ alruwita.k@gmail.com ☎ +966566200419 🌐 kr.sa 🔗 linkedin.com/in/khaled-alruwita/ 🐙 Github 📍 Riyadh

Summary

Data Engineer and Data Analyst with strong experience in designing end-to-end data pipelines, building scalable data platforms, and automating ETL workflows using Python and SQL. Proven in delivering reliable, high-quality datasets through data warehousing, orchestration, and observability practices. Skilled at translating complex data requirements into production-ready solutions that support analytics.

Experience

- Business Intelligence & Reporting Analyst, Alrajhi Bank** 07/2026 – Present
I drive Private Banking performance by establishing strategic KPIs for Relationship Managers, Team Leaders, and District Managers, creating comprehensive reporting dashboards, and leveraging AI to deliver predictive analytics that forecast future business states.
- Graduate Development Program, Alrajhi Bank** 02/2026 – 07/2026
- **Program Foundations:** Graduated from the Blue Generation Development Program (BGDP) via specialized training and mentorship.
 - **Product Management:** Managed the end-to-end development lifecycle to launch new business app features.
 - **Core Infrastructure:** Acquired hands-on experience in bank systems and database infrastructure.
- Data Engineer Intern, SITE** 08/2025 – 01/2026
- Built a data engineering toolkit to automate SQL validation, cutting manual workload by 80% and providing leadership with visibility into data quality, lineage, and transformation health.
 - Built a fully automated daily ETL pipeline transforming raw data into cleansed layers, dashboards, and reports.
 - Collaborated with the data modeling team to design and refine dimensional models and warehouse schemas.
- Data Analyst Intern, Keeta Technology Arabia Limited** 06/2025 – 08/2025
- Performed data cleaning, validation, and quality checks on large datasets complied with internal data management processes and reporting standards

Education

Bachelor's Degree in Computer Information Systems, Prince Sattam Bin Abdulaziz 08/2021 – 05/2025

Certifications

Certified Data Management Professional (CDMP®) Associate DAMA International	Business Analysis Fundamentals Tuwaiq Academy
---	---

Projects

Traffic Simulation Project 📄, [Final Year Project]
Developed a traffic simulation at PSAU campus to optimize vehicular flow. Evaluated metrics like wait time and throughput across scenarios (e.g., new traffic lights and gates), analyzing the results using decision trees.

- The project was awarded Best Research Project at the university level for the year 2025

Warehouse & ETL Platform 📄
Built an end-to-end ETL pipeline for used-car listings using Python, SQL, PySpark, Airflow, and PostgreSQL. Implemented bronze-silver-gold layers, star-schema modeling, automated orchestration, data-quality checks with Great Expectations, and interactive dashboards for analytics and impact analysis.

Skills

Back-End Python , MongoDB , Flask , Django , PostgreSQL , Airflow	Front-End HTML, CSS, JavaScript, Streamlit
Cloud Computing AWS (EC2, S3, Lambda), Alibaba Cloud (ECS), Oracle Cloud Infrastructure	Data Analysis/Visualization Power BI , Tableau , Pandas , PySpark
