

KHALED ALRUWITA

Data Analysis & Data Engineer

✉ alruwita.k@gmail.com ☎ +966566200419 🌐 kr.sa 🔗 linkedin.com/in/khaled-alruwita/ 🐙 Github 📍 Riyadh

Summary

Data Engineer and Data Analyst with strong experience in designing end-to-end data pipelines, building scalable data platforms, and automating ETL workflows using Python and SQL. Proven in delivering reliable, high-quality datasets through data warehousing, orchestration, and observability practices. Skilled at translating complex data requirements into production-ready solutions that support analytics.

Experience

Business Intelligence & Reporting Analyst, Alrajhi Bank 07/2026 – Present

I drive Private Banking performance by establishing strategic KPIs for Relationship Managers, Team Leaders, and District Managers, creating comprehensive reporting dashboards, and leveraging AI to deliver predictive analytics that forecast future business states.

Graduate Development Program, Alrajhi Bank 02/2026 – 07/2026

- **Program Foundations:** Completed the Blue Generation Development Program (BGDP) through a blend of certified professional courses, specialized workshops, and mentorship.
- **Product Management:** Drove digital transformation in the business app by managing the end-to-end development lifecycle to launch new features and products.
- **Core Infrastructure:** Navigated the technical track during the second rotation, gaining hands-on expertise in systems and database infrastructure for the bank system.

Data Engineer Intern, SITE 08/2025 – 01/2026

- Built an end-to-end data engineering toolkit that automated SQL validation and optimization, reducing manual workload by ~80% and providing executives and leadership with reliable visibility into data quality, lineage, and overall transformation health.
- Built a fully automated daily ETL pipeline transforming raw data into cleansed layers, dashboards, and reports.
- Collaborated with the data modeling team to design and refine dimensional models and warehouse schemas.

Data Analyst Intern, Keeta Technology Arabia Limited 06/2025 – 08/2025

- Performed data cleaning, validation, and quality checks on large datasets complied with internal data management processes and reporting standards

Education

Bachelor's Degree in Computer Information Systems, Prince Sattam Bin Abdulaziz 08/2021 – 05/2025

Certifications

Certified Data Management Professional (CDMP®)
Associate DAMA International

Business Analysis Fundamentals
Tuwaiq Academy

Projects

Traffic Simulation Project 📄, [Final Year Project]

Developed a comprehensive traffic simulation at Prince Sattam bin Abdulaziz University (PSAU) campus to optimize vehicular flow under different scenarios. The project evaluated key traffic metrics such as stop time, waiting time, and vehicle throughput across scenarios like introducing new traffic lights and adding campus entry gates. Results were analyzed using decision tree algorithms to support data-driven traffic management decisions.

- The project was awarded Best Research Project at the university level for the year 2025

Warehouse & ETL Platform 📄

Built an end-to-end ETL pipeline for used-car listings using Python, SQL, PySpark, Airflow, and PostgreSQL. Implemented bronze-silver-gold layers, star-schema modeling, automated orchestration, data-quality checks with Great Expectations, and interactive dashboards for analytics and impact analysis.

Skills

Back-End

Python , MongoDB , Flask , Django , PostgreSQL , Airflow

Cloud Computing

AWS (EC2, S3, Lambda), Alibaba Cloud (ECS), Oracle Cloud Infrastructure

Front-End

HTML, CSS, JavaScript, Streamlit

Data Analysis/Visualization

Power BI , Tableau , Pandas , PySpark
